

Mykyta Opanasiuk

Front-End Developer
NTU “KhPI” student

Summary

I am a student who wants to connect his life with Front-End or Full-Stack development. Currently, I have no practical experience, but I want to gain it, so EPAM's Front-End Development programme is what I need.

I am currently trying to gain knowledge of React. I also have basic skills in developing web applications on Spring Boot, as Java is the main programming language at the university. It helped me a lot to understand HTML and CSS. I also studied HTML/CSS and JavaScript in a separate discipline, so I have skills in these technologies (git of laboratory works).

In my free time, I am engaged in self-study, completing the Meta Front-End Developer course, and also learning more about Full-Stack development on the Codecademy website.

Education

*National Technical University
«Kharkiv Polytechnic Institute»*

Bachelor's Degree in Software Engineering
September 2021 - Present

Meta Front-End Developer Course
May 2023 - Present

Codecademy Full-Stack Engineer Path
Dec 2023 - Present
